

# COUNTER-TOP RECIRCULATING HOODS

**GVH-C** for applications requiring  
fire suppression.

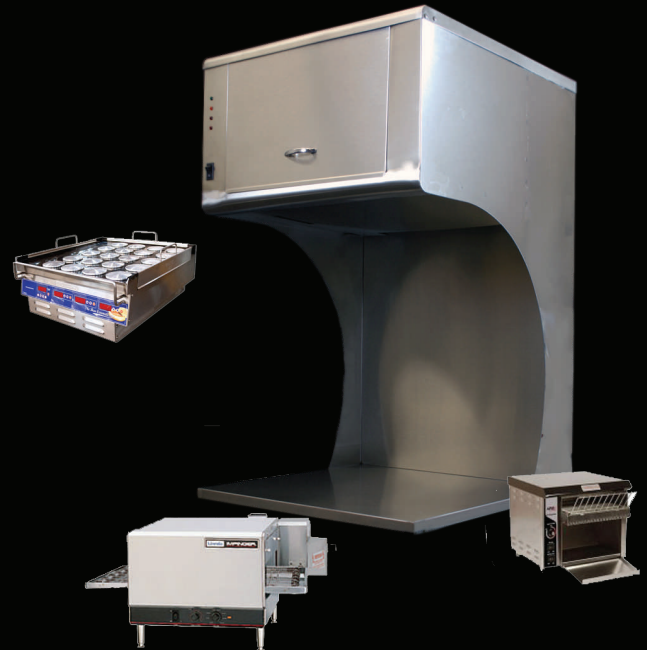

**OVH-10-C** for applications not  
requiring fire suppression.

**GVH-C**

**OVH-10-C**

**These Recirculating Hoods are listed for use with numerous electric counter-top appliances—Fryers, Griddles, Ranges, Toasters and Ovens. GVH-C and OVH-10-C exceed emission requirements of NFPA-96/UL710B and UL197, respectively.**

- GVH-C is available with built-in, interlocked, appliance power receptacle and is pre-plumbed for installation of ANSUL R102 Fire Suppression System—piping, nozzles, fusible link brackets and conduit.
- Both contain Giles' proven multi-stage Electrostatic Filtration System for grease-laden vapor removal and cooking aroma control.
- UV Lamp Package available as an optional enhancement on both models.
- Venting to the outside not required ... No ductwork or costly building modifications ... Ideal for use in non-traditional spaces.
